Hurricane Packing Checklist

What to take if you evacuate and what to stock at home

Water planning

Red Cross baseline: 1 gallon per person per day, plus extra for pets.
South Carolina's hurricane guide recommends 2 gallons per person per day.

Pack a go-bag

- [ ] Water and shelf-stable food for at least 3 days. Pack heavy water separately in containers you can take with you.
- [ ] Prescriptions, medication list, first-aid supplies, glasses and needed medical devices.
- [ ] Phone charger, charged power bank, flashlight or headlamp, and spare batteries.
- [ ] IDs, emergency contacts, insurance information, cash in small bills and spare keys in a waterproof pouch.
- [ ] Change of clothes, sturdy shoes, rain jacket, small toiletries and hand sanitizer.
- [ ] Baby supplies: formula or food, bottles, diapers and wipes, if needed.
- [ ] Pet kit: food, water, medications, leash or carrier, waste bags and vaccine records.
- [ ] Paper map or saved offline directions. Keep the route, go-bag and car supplies together.

Stock up at home

- [ ] Water and shelf-stable food for 2 weeks. Include dietary needs and a manual can opener.
- [ ] Prescription refills, first-aid kit, hygiene items and any household medical supplies.
- [ ] Flashlights, lanterns, extra batteries, charged power banks and a battery or hand-crank radio.
- [ ] Cooler, ice packs and a food thermometer for a power outage.
- [ ] Soap, wipes, toilet paper, paper towels, trash bags and basic cleaning supplies.
- [ ] Extra pet food, litter and water. Stock diapers, wipes and feeding supplies if needed.
- [ ] Backup power for essential medical devices. Test battery-powered or battery-backup carbon monoxide alarms.
